DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-9** are rejected under 35 U.S.C. 102(b) as being anticipated by **Coupe et al.** (U.S. Patent Application Publication # 2002/0064189 A1).

Consider **claims 1 and 7**, Coupe et al. discloses a method and a subscriber distribution system for distributing broadcasting data to subscribers through an subscriber network, the subscriber distribution system comprising: a program id (PID) filter section (16, transport demultiplexor, figure 2 and 113-114 figure 5) for checking contents of an inputted MPEG2 multiple program transport streams (MPTS) frame and splitting the MPEG2 MPTS frame into a plurality of single program transport streams (SPTS) ([0047], [0061] lines 4-13); a table regenerator (113 or 114, figure 5 and 200, figure 6) for regenerating a program allocation table (PAT) and a program map table (PMT) that corresponds with the SPTS by changing contents in the PAT and the PMT with respect to the MPTS when the MPTS is split into said plurality of single program transport streams separate from general MPEG data ([0061] lines 4-22, [0062] lines 1-15, [0064] lines 3-7); a SPTS splitting and storing section (46, figure 2 and 115 or 116, figure 5) for storing the SPTS at high speed in a memory area of a buffer, which is assigned to subscribers according to PIDs ([0047] lines 9-19, [0048] lines 13-22, [0061]

lines 16-19); a subscriber distribution section (66, figure 3) for selecting the SPTS requested by subscribers and storing the SPTS in the memory area of the buffer assigned to subscribers ([0048] lines 13-26); and a control section (68, figure 3) receiving MPTS information from a higher network to provide MPTS information to the PID filter section and the table regenerator, receiving a request for a program from subscribers, and transferring the request to the subscriber distribution section ([0048] lines 13-28, [0067]).

Consider **claims 2 and 9**, and as applied to claims 1 and 7, respectively, Coupe et al. discloses wherein a quantity of filters in the PID filter section corresponds to a quantity of SPTSs that the MPTS has been split into (figure 3 and 5, [0059], [0061]).

Consider **claims 3 and 8**, and as applied to claim 1 and 7, respectively, Coupe et al. discloses wherein the control section receives program information requested by subscribers through a channel change protocol (CCP) (70, User Remote Control, figure 3, [0048] lines 22-26).

Consider **claim 4**, and as applied to claim 1, Coupe et al. discloses wherein the SPTS splitting and storing section and the subscriber distribution section adopt a direct memory access (DMA) technique ([0047] lines 9-19, [0048] lines 13-22, [0061] lines 16-19).

Consider **claim 5**, and as applied to claim 1, Coupe et al. disclose wherein the PID filter section includes at least one PID filter for filtering a plurality of PIDs contained in the MPEG2 MPTS ([0047], [0061] lines 4-13).

Consider **claim 6**, and as applied to claim 1, Coupe et al. disclose the subscriber distribution system further comprising a subscriber interface (66, 63 and 65, figure 3) for converting the SPTS stored that match with each subscriber into a stream to transmit the SPTS to each subscriber ([0048] lines 13-28).

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
